- Adding internationalization with i18n
- Creating MERN stack app
- Next.js

SELECTED PROJECTS:

- Personal Portfolio: [CODE](#) / [DEMO](#)
- MERN Stack Social App: [CODE](#)
- METAVERSUS: [CODE](#) / [DEMO](#)
- Weather Forecast App (TS): [CODE](#) / [DEMO](#)
- React Todo App: [CODE](#) / [DEMO](#)

2022.07 — 2022.09

#### Digitas/ Leo Bennett

Frontend Developer

In the team of development of digital agency Digitas, in the person of art director/designer, project manager and web developer, worked on such tasks as:

- Classic landing
- Adapting existing landing pages
- Adding new features
- Redesigning templates
- Creating designs
- Corporate website development for Ingrad
- Independent project management and control (was the only developer in the team)

2020.10 — 2022.06

#### Ipsos Simstore

Digital Producer & Frontend Developer

Together with the international technical team (frontend, backend, lead, QA, UX designer):

- Developed components for low code platform used for assembling questionnaires (ReactJs/Storybook)
- Programmed logic (JS) for correct target audience gathering for marketing research
- Developed individual questionnaire layouts for clients, optimized the completion of questionnaires by users with the help of scripts (JS)
- Responsible for programming questionnaires on the low-code platform for data collection in accordance with established specifications and deadlines
- Created training documentation in English for new employees, including technical documentation on using the platform, creation of informative tables for creating and styling questionnaires, video tutorials for working with Adobe PS
- Actively and effectively collaborated with the international team, colleagues from other departments in English and, if necessary, cooperated with freelancers at UPWORK

- Edited product images and created plausible virtual shelves for Virtual Shopper Research projects according to company quality standards

My achievements over the years:

- Mentoring role for new members of the development team (front), conducting onboarding sessions for immersion in the product
- The Role of the unofficial leader of the Russian development Team, who was always relied on
- A great contribution to writing documentation in English for an international team that has greatly speeded up the onboarding process and generally increased the speed and quality of development work
